

PROFESSIONAL SUMMARY

Junior .NET Developer with around one year of experience in developing and maintaining web applications using C#, ASP.NET Core, and SQL Server. Experienced in building responsive user interfaces with Blazor and developing RESTful APIs for scalable applications. Strong understanding of database management, API integration, and secure authentication using JWT. Passionate about learning new technologies and contributing to efficient and reliable software solutions.

EXPERIENCE

Sasken Technologies	Hybrid
<i>Junior .NET Developer (Full-time)</i>	<i>Feb 2025 - Feb 2026</i>
Full Stack Development: Developed backend APIs and Blazor Server UI using ASP.NET Core for an Access Request Management System. Frontend Development: Built responsive and interactive user interface components using Blazor to improve user experience. Database Management: Designed and maintained SQL Server tables and wrote optimized queries using SSMS for application functionality. API Integration: Implemented and consumed REST APIs to enable communication between application modules and external services. Authentication and Security: Integrated JWT authentication to ensure secure access control within the application. Debugging and Performance: Debugged application issues and optimized backend logic to improve system performance and stability. Power BI Reporting: Created interactive dashboards and reports using Power BI to visualize application data and provide actionable insights. Version Control: Used GitLab for source code management, version control, and collaboration with the development team. Agile Development: Worked in Agile sprints to deliver features based on business requirements and project timelines. Application Enhancement: Implemented form validations and handled user input to ensure accurate data processing and smooth workflow.	

TECHNICAL SKILLS

- Programming Languages:** C#, Core Java, SQL, TypeScript
- Frameworks & Technologies:** ASP.NET Core, Blazor Server, Entity Framework
- Web & API Development:** REST APIs, Web APIs, JWT Authentication
- Frontend:** HTML, CSS, Bootstrap, Angular
- Database:** SQL Server
- Tools & Platforms:** Visual Studio, VS Code, SQL Server Management Studio (SSMS), GitLab, Postman, Power BI
- AI Productivity Tools:** ChatGPT, Claude, Perplexity, GitHub Copilot, Stitch
- Development Methodology:** Agile

PROJECTS

- Access Request Management Portal (Professional Project):** Developed an internal portal to manage user access requests with a three-level approval workflow for secure role-based access.
- EEG Cognitive Assessment for Blind Individuals (Academic Project):** Analyzed EEG data from headband technology to study cognitive patterns in visually impaired individuals and support inclusive employment insights.

EDUCATION

Bapuji Institute of Engineering and Technology	
<i>Bachelor of Engineering - Information Science; CGPA: 8.5</i>	<i>2021 - 2024</i>
DRR Government Polytechnic College	
<i>Diploma - Computer Science and Engineering; Percentage: 77%</i>	<i>2018 - 2021</i>

CERTIFICATIONS

- Complete ASP.NET Core 9 Course for Busy Developers
- Blazor Deep Dive - Beginner to Advanced (.NET 8)

SOFT SKILLS

- Problem Solving:** Ability to analyze technical issues and implement effective solutions in software development.
- Team Collaboration:** Experienced in working with cross-functional teams in Agile environments to deliver project requirements.
- Communication:** Strong verbal and written communication skills for effective collaboration and documentation.
- Time Management:** Capable of managing multiple tasks efficiently while meeting deadlines in a fast-paced development environment.
